Skills

Technical skills : ReactJS, Javascript (ES+6), Python, HTML, CSS, TailwindCSS, JEST, Gulp, Sitecore(CMS), REST API, GitHub Actions (CI/CD),Git.

Work Experience

Accenture
Dec 2022 - Present
Software Engineering Analyst

- Designed and launched a robust, fully responsive real-time chatbot interface leveraging direct integration with a client-supplied Gemini LLM API, ensuring seamless and intelligent interactions across all platforms.
- Implemented advanced ChatGPT-style features in the chatbot, including dynamic contextual memory for smooth conversation flow, a smart 'Start Over' reset for fresh interactions, and intuitive reference buttons to enhance engagement and streamline follow-ups.
- Embedded advanced voice interaction capabilities with Web Speech API, dramatically enhancing accessibility and user experience by allowing natural, hands-free communication.
- Led the end to end migration of multiple client forms from legacy reCAPTCHA v2 (checkbox) to Google reCAPTCHA Enterprise (Invisible), utilizing Javascript asynchronous token workflows, and event driven UI logic to deliver frictionless user experiences and enhanced security, while implemented secure RESTful endpoints and robust token verification logic in C# (.NET) on the backend.

Software Engineering Associate

- Initially supported the development of two mobile applications using React Native, working on UI components and app deployment for both Android and iOS platforms.
- Progressively transitioned to working on six public - facing websites Feature enhancements, bug fixes, cross-browser and responsive layout issues.
- Designed and implemented mobile-first layouts using advanced CSS3, Media Queries, and Flexbox for optimal cross-device display; built reusable components and contributed to large-scale frontend refactoring to modernize a legacy codebase.

Education

MITS, Madanapalle
Aug 2018 - Jun 2022
B.Tech in Computer Science and Technology
CGPA : 8.2

Project Work

Nitya Naivedya: https://nityanaivedya.com/

- Built a responsive business website with a focus on clean UI and performance.
- Optimized loading speed by converting images to WebP, resizing assets, and reducing CSS bloat via Tailwind.
- Implemented a real-time enquiry automation system using Zapier to capture form data via Netlify, trigger WhatsApp alerts through the Business API, and send formatted emails to Zoho Mail.

Safar Perfume: https://www.safarfragrance.com/

- Developed and launched a custom eCommerce site for a perfume brand using Shopify.
- Enhanced the Dawn theme with custom CSS and JavaScript to deliver advanced animations, responsive layout fixes, and dynamic content behavior.

Achievements

- Sparkling star of the month award (May-June 2024) for best performance and contribution in the team.
- Proposed an innovative feature to simplify complex medical terms into a plain language, accepted by the client to improve accessibility and user experience for non medical audiences.
- Certified in "Python for Everybody" by Coursera (University of Michigan)
